Men 8/10

Men 8/10

The diagram illustrates a vertical cross-section of a road pavement structure. The layers are labeled as follows from top to bottom:

- Surface Layer:** A thin layer at the top, labeled with a thickness of  $h_s$ .
- Base Layer:** A thicker layer below the surface, labeled with a thickness of  $h_b$ .
- Subgrade:** The bottom layer, labeled with a thickness of  $h_{sg}$ .

The diagram also shows the water table level, indicated by a dashed line. The water table is located within the subgrade layer, at a depth of  $h_w$  from the bottom of the subgrade. The diagram is labeled with various dimensions and material properties, including the permeability coefficient  $k$  and the unit weight  $\gamma$ .
